Rajiv Gandhi Institute of Petroleum Technology (RGIPT), Jais, Amethi, UP, India

Education

Rajiv Gandhi Institute of Petroleum Technology (RGIPT)

2025 – Present

B.Tech in Mathematics and Computing

Academic Performance: First Year CGPA: 9.21 / 10.00 (Top 5 in Cohort)

Previous Education: 12th Standard: 98.30% | 10th Standard: 9.8 CGPA

Technical Skills

Programming Languages: C, C++, Python, JavaScript, MATLAB

Core CS: Data Structures & Algorithms

AI / ML: Prompt Engineering

Cloud Technologies: Amazon EC2, Amazon S3, AWS IAM, Amazon VPC, Amazon CloudWatch, AWS SNS, Security Groups, Elastic IPs, AWS CLI

Web Development: HTML, CSS, JavaScript, React

Developer Tools: Git, GitHub, VS Code, Windows Subsystem for Linux (WSL), L^AT_EX

Areas of Interest: Artificial Intelligence • Machine Learning • Software Development • Cloud Computing

Experience

AWS Cloud Intern – ThinkChamp

May 2026 – July 2026

- Designed and deployed cloud infrastructure on **Amazon EC2**, **Amazon S3**, **Amazon VPC**, and **AWS IAM**.
- Implemented identity and access management policies following AWS security best practices.
- Built and deployed cloud-based web applications through hands-on AWS projects.
- Gained practical experience in cloud architecture, networking, storage, and deployment workflows.

Cybersecurity Analyst Job Simulation – Tata (Forage)

Oct 2025

- Analyzed enterprise network security architectures to identify access management vulnerabilities.
- Conducted threat modeling and drafted security incident response reports to strengthen security posture.

Projects

CollegeConnects (Startup) – Chief Information Officer (CIO) | React, JavaScript, HTML, CSS, AWS collegecon-nects.co.in

- Led technical strategy as CIO for a student platform connecting aspirants with academic mentors.
- Built responsive front-end interfaces using **React** and configured cloud web hosting on **Amazon EC2** and **S3**.
- Streamlined student onboarding and user workflows, delivering a reliable live web platform.

AI-Powered Study Assistant – Lead Developer | Python, React, JavaScript, Prompt Engineering

- Engineered an interactive AI study application featuring automated document analysis and question answering.
- Implemented structured **prompt engineering** techniques in **Python** to improve answer accuracy and context clarity.
- Created a responsive **React** interface with state handling to streamline study material interaction.

RGIPT Hostel Portal – Frontend Developer | HTML, CSS, JavaScript

- Developed a responsive web portal to digitize student room allocation audits and hostel records.
- Built dynamic web forms and client-side validations using modular **JavaScript**.
- Optimized page load times and simplified administration workflows across campus housing.

Leadership

- Technical Co-Executive – E-Cell RGIPT:** Coordinated web infrastructure and mentored students on technical projects.
- Chief Information Officer – CollegeConnects:** Directed product architecture, technical strategy, and engineering roadmap.
- Google Gemini Student Ambassador:** Organized campus AI workshops and developer sessions on generative AI tools.
- AWS Student Builder Group Leader:** Conducted cloud computing workshops covering Amazon EC2, S3, and IAM fundamentals.

Achievements

- Reliance Foundation Undergraduate Scholar (2025–26):** Awarded prestigious national merit scholarship.
- Top 5 in Mathematics & Computing:** Achieved a First-Year CGPA of 9.21 / 10.00 at RGIPT.
- Google Gemini Certified Student:** Certified in generative AI tools by Google for Education.
- Google AI Certification:** Completed Google professional artificial intelligence coursework.
- HP LIFE Data Science & Analytics:** Earned professional analytics certification.
- GQMC Qualification Certificate:** Qualified in global quantitative mathematics competition.
- Tata Cybersecurity Job Simulation:** Completed practical network security and IAM simulation via Forage.
